Office Action Summary	Application No. 10/673,488	Applicant(s) SUDO, YUKIO	
	Examiner Nelson Yang	Art Unit 1641	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of claims 1, 3-6, 14, 15 in the reply filed on August 4, 2006 is acknowledged.
2. Claims 2, 7-13, 16-18 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention or species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on August 4, 2006.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1, 3-6, 14, 15 are rejected under 35 U.S.C. 102(e) as being anticipated by Wagner et al. [US 6,682,942].

With respect to claims 1, 3, Wagner et al. teach a plurality of microchannels (column 11, lines 4-20) with reactive sites (column 10, lines 32-40), wherein the reactive sites comprise a monolayer of linker molecules of the formula X-R-Y (column 15, lines 7-40). X may be a sulfonyl group (RSO₂R) (column 17, lines 28-31), R is a linear hydrocarbon chain about 1 to 400 carbons long (column 16, lines 7-30), and Y is a highly reactive functional moiety capable of reaction with a biological moiety or its affinity tag (column 17, lines 30-50), such as antibodies

(column 20, lines 20-31). Therefore the linker molecules of Wagner et al. would fulfill the formula recited by applicant.

5. With respect to claim 4, different biological moieties may be immobilized on different reactive sites (column 4, lines 1-10)

6. With respect to claim 5, 6, the biological moieties of Wagner et al. may be antibodies (column 20, lines 20-31), and therefore would form biological specific bonds with an antigen or ligand.

7. With respect to claim 14, the biological moieties of Wagner et al. may be antibodies (column 20, lines 20-31).

8. With respect to claim 15, the channels may be formed in a silicon substrate (column 7, lines 60-67).

Conclusion

9. No claims are allowed.

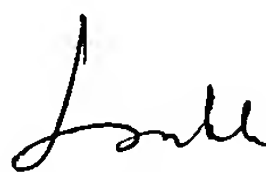

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nelson Yang whose telephone number is (571) 272-0826. The examiner can normally be reached on 8:30-5:00.
